

## Contemporary Desert Luxury Overlooking Las Vegas

TruStile Doors is a proud sponsor of the 2019 New American Home. The 9,000-square-foot show home is nestled in the side of a hill in the gated luxury community of Ascaya in Henderson, NV with a view overlooking the Las Vegas Strip. The interior design is inspired by its desert surroundings and incorporates interesting textures in each room. The design team at Sun West Custom Homes chose a variety of door styles from the Tru&Modern™ Collection to complement the contemporary interior design of the home.

The Sun West team pushed new boundaries of how to use a door. A central hallway, off the main entrance, is a key feature of the house. Situated behind the open concept living room, custom 12' tall TMIR6000 Infinite Rail doors with stainless steel inlay create a 50 foot long wall leading to the master bedroom suite. While most of these doors are inoperable, an active swinging door sits at the end. This door can close off the master bedroom suite or be discreetly tucked into the wall.

At the opposite end of the hallway, TMIR6000 doors open to two guest bedrooms. These doors use ¼" kerf cut reveals instead of steel inlays, complementing the hallway doors while defining their own unique space.

TMIR6000 doors in plain sawn white oak with Grey Mist handwiped stain. Doors on right feature ½" bright stainless inlay; swing door features ¼" kerf cut reveal.

TMIR6000 barn door with 1/4" kerf cut reveal in plain sawn white oak with Grey Mist handwiped stain

TM9420 in plain sawn white oak with Grey Mist handwiped stain and Capiz resin

A TMIR6000 barn door, with ¼" kerf cut reveals, punctuates the end of a hallway behind the kitchen and creates an interesting sliding opening to the pantry. Around the corner, a matching TMIR6000 swing door opens to a bedroom suite.

An oversized TS5080 pocket door with Dash glass separates the laundry room while allowing in light to brighten the area. Similar TS5080 pocket doors with Dash glass provide privacy for the master bath water closets.

The bathrooms of the guest rooms feature Capiz resin on a TM9420. The home has unique styles in every room, and the interior doors allow the design to connect from space to space.

The 2019 New American Home is a truly unique project and beautifully showcases the impact that well designed interior doors can have on a space.
